All good

Excellent

Everything is good

Communication with students

yes

Everything is fine

Nope

Must improve paper valuation

Well

No remarks

Nothing to say

Before coming to class prepare concept thoroughly

Normal

Encourage students to be curious, explore freely, and collaborate for innovative ideas.

Please make sure t teach the students with the new technologies and practical knowledge and how to make money out this btech

.....

nothing

Ac class rooms

Provide AC classes

It's very good interaction with teachers.They never disappoints us they are ready to serve us again and again if we are with enunmerous doubts

Do

Use Black board to explain, increase voice to speak,easy way to explain everything

Better communication, be friendly, be kind to us

Provide ac classes,provide hygiene classes ,provide stress less classes.

Good material, easy understandable lectures

All teachers should be expert not like some one only teach good ,some teachers are only experts.Labs are less familiar to staff they teach like relaxed

Improve the lab facilities and conduct technical programs and conduct sports tournaments

Improve somewhat better

Class room assignments.

Give some time to prepare for the practicals ....as we are Ece students we are not able to perform practicals everyweek at the first time itself....but sirs are forcing us to get the output at the first attempt in practice labs

-

Nothing else

nthg

Practical learning, teaching the content deeply

Good experienced teachers, nice communication with students and good environment that can promotes and enhance our educational skills...

Digital explanation

Teach slow,try to explain clearly ,

Use technology in the classroom

Teachers are being very friendly, good style of teaching,

1.Good Interaction with students 2.Motivating students to learn more from out of what they learn in syllabus or books Teachers doesn't have to show partiality between students

Good faculty

Skills wise learning is less than compared to academics, especially in our branch there is no skills based learning

Should improve in some fields

Practical knowledge is required more

Teachers are lagging behind to implement practical things towards students

To improve teaching teacher can explain according to student point of view

To do internships outside , and better to take to field visits.

In our current sem we have 1 best teacher out of 5 subjects...due to this ratio we become poor in subjects

They are giving their best.So, There's nothing to suggest.

Teacher should teach the subject little slower

Syllabus reduce

Need to have Better connections between teachers and students

1.Explain with Real Life Examples. 2. Complete Total Syllabus. 3.Help students to improve Practical Knowledge

Better don't use the ppt slides method of teaching for problematic subjects better to follow black board
